

"Thank you for helping my father find peace among the demons of war that he carried with him for so long."

B. Franklin

"There comes a time when all the cutting-edge medicine in the world can't cure the illness, treat the disease or slow the aging process. It is at this point when our hospice and palliative care services stand as our last opportunity to thank America's veterans, to provide them comfort and compassion and to help them find peace..."

Anthony J. Principi

*Former U.S. Department of
Veterans Affairs Secretary*

*Veterans
Program*

Community Healthcare of Texas is honored to offer a Veteran's Program to those who have served in our military. Community Healthcare of Texas addresses the unique concerns of veterans and strives to bring them peace, dignity and comfort wherever they call home. Our team of professionals is specially trained to guide you through the life enhancing processes to address individual needs, thus making the Veteran's Program a natural extension of our mission.

Hospice services are fully covered through the Veterans Affairs (VA) benefits, Medicare, Medicaid and private insurance companies.

SUPPORT

Physical comfort and disease management are critical to patient care. Patients and families may also need emotional and spiritual support. Our team of hospice professionals will guide you to address priorities, wishes and needs.

RESOLUTIONS

For veterans, deep rooted memories of combat may manifest in different ways and are often recounted near the end of life.

During the "final battle," the team at Community Healthcare of Texas will work to identify and respond to these issues.

Our goal is to bring peace to the people we serve and we will meet them wherever they are in their emotional journey. Common concerns are:

- ~ Guilt
- ~ PTSD
- ~ Sadness
- ~ Fear
- ~ Feeling Overwhelmed
- ~ Unresolved Grief
- ~ Isolation
- ~ Anger
- ~ Loss of Hope
- ~ Financial Concerns

COMFORT

Medications, medical equipment and medical supplies are provided for comfort and convenience while managing the patient's illness.

The hospice team aims to prevent breakthrough pain and prevent uncomfortable trips to the Emergency Room.

IMMEDIATE NEEDS

Acute pain or symptoms are identified and a plan for management and prevention is developed. Equipment to enhance comfort such as a hospital bed or oxygen is provided.

LONG TERM PLAN

A fluid, comprehensive plan incorporates patient goals, history, current symptoms, disease progression, emotional and spiritual needs.

EMERGENCY SYMPTOM MANAGEMENT

- ~ Physician house calls as indicated
- ~ Home "Emergency Kits"
- ~ Support available 24/7
- ~ Continuous Care or Inpatient Care for relief and control of critical symptoms
